Professional Summary

Junior Software Engineer and CTO with hands-on experience in system architecture, software-hardware integration, and embedded development. Proficient in Rust, C, and C++, with strong problem-solving abilities and a commitment to team collaboration and DevOpsSec practices. Passionate about building scalable and efficient solutions while continuously enhancing technical and leadership skills.

Work Experience

System Administrator

Nov 2024 - Present

Azrieli College of Engineering

- Provide technical support for classrooms and lecture halls, ensuring optimal operation of PCs, projectors, cameras, and microphones.
- Diagnose and resolve hardware and software issues for faculty and staff, enhancing system reliability.
- Collaborate with IT teams to prepare and deploy Windows 11 system images across campus workstations.
- Assist in troubleshooting network and peripheral integration issues in academic environments.

CTO & Co-Founder

Aug 2023 - Present

DAR

- Lead the development of hardware and software solutions to prevent wildlife collisions with vehicles.
- Oversee system architecture, product design, and technology roadmap to ensure technical excellence.
- Manage a team of developers and engineers, ensuring timely delivery of milestones.
- Integrate embedded systems and software layers using Rust, C, and C++, focusing on scalable solutions.
- Collaborate with automotive and IoT partners for field deployment and testing activities.

Network & System Administrator

Jun 2019 - Jul 2022

Ministry of Health / IDF

- Managed and supported network and computing infrastructure in governmental and military environments.
- Provided technical support for end-users, successfully diagnosing and resolving hardware and software issues.
- Configured and maintained Active Directory, DNS, and IPv4 settings to secure network access.
- Performed system imaging, installation, and maintenance of Windows-based workstations.
- Oversaw IT logistics, ensuring operational readiness of computing resources.

Education

B.Sc. in Software Engineering

Oct 2022 - Present

Azrieli College Of Engineering

Network And System Administration

Nov 2019 - Dec 2019

IDF, Israel
